

## **Eurotunnel: Buffer zone at the Coquelles Terminal**

*France (April 20, 2016)*

To improve security, Eurotunnel has created a dedicated “buffer zone” before check-in at the Coquelles Terminal that enables up to 150 vehicles to be parked in a secure zone should the need arise.

When the service is fluid, the zone remains empty so that traffic can be diverted at short notice to check-in as smoothly as possible.

Drivers must not to park in this area unless advised to do so because traffic flows are adversely impacted by parked vehicles.

Failure to follow this recommendation may result in queues reaching the A16 motorway and therefore the risk of illegal intrusions.

The zone is currently segregated with temporary cones but it will be clearly marked in the next few months.

A secure Truck Park including the Total service station is available adjacent to the “buffer zone”.
