Dear TIR Focal Points,

I am writing to you on behalf of Mr. Hakan DALÇIK, Head of TIR Department.

In accordance with the new Customs Communiquo, with a view to facilitate and accelerate the customs procedures and to ensure the risk analysis earlier and more effectively, implementation of pre-declaration submission for the transport of goods under cover of the TIR Carnet will be compulsory for all the hauliers before the arrival of the vehicle (including Ro-Ro transports) into the Turkish Customs Territory as of April, 25th 2017.

Since there are two options to submit the advance declaration before the arrival of the vehicle into the Turkish Customs Territory, it may either be chosen TIR-EPD System or the Pre-Declaration System (TIRCUS), newly put into use by the Ministry of Customs and Trade of Turkey.

The foreign transport operators owing no agencies in Turkey, will also be able to submit the pre-declaration via TIRCUS by taking username and password from customs offices if they have a TTN or foreigner ID number given by the Turkish Government.

Electronic pre-declaration must be sent to the customs office of entry in Turkey before the arrival of the vehicle carrying the goods covered by the TIR Carnet into the Turkish Customs Territory. The TIR Carnet without pre-declaration shall not be accepted by customs office of entry and the haulier shall be required to provide a pre-declaration via TIRCUS or TIR-EPD.

On the other hand, if the pre-declaration is submitted after the arrival of the vehicle into the Turkish Customs Territory the transport operator and the goods carried shall be separately examined within the framework of the risk criteria.

In line with the TIRCUS Programme, we have revealed the "User Manual" including the FAQ, attached. Furthermore, <https://uygulama.gtb.gov.tr/TIRCUS> is the web address for the application.

Regards,
Ruken Mermer
