

Important Information for transports exiting Turkey - URGENT

Turkey - Bulgaria (December 14, 2018)

“Due to high transit volume of either Kapikule or Kapitan Adrevo Border Customs Gates, it is decided that **only Hamzabeyli Customs Border Gate has to be used for the transport operations (under TIR and Common Transit regimes) which destination point is Bulgaria**. This implementation has exception for the transports that are subject to veterinary control and plant quarantine. This decision is taken in order to decrease the density and high volume of Kapikule and Kapitan Andrevo Border Customs Gates”.

Please note that the relevant decision will be in force as of 18/12/2018.
