

HIGHWAYS UNDER CONSTRUCTION

Dear trucker colleagues,
There's a hot summer awaiting you
on the Czech roads. The extensive
reconstruction of the motorway network
will continue in 2019.

Please take the greatest possible care, and observe these important rules!

- Comply with the traffic signs before narrowed points, adjust your speed and driving style accordingly and enable drivers to change lanes.
- Keep as far to the right as possible in the right lane for trucks, to enable cars to pass safely in the left narrowed lane.
- The rule that there must be a rescue lane between the left and adjacent lane also applies in the Czech Republic.
- Always keep at a safe distance from the vehicle in front.
- Do not overtake just before or after a closure, even if there are no signs explicitly prohibiting this.

The police conduct increased surveillance at problematic points
and the Czech authorities are also able to identify foreign drivers.

We want you to pass through the Czech Republic safely, with no
accidents, financial losses or points on your driver's licence.

More information is available for you at
