

## Simplifying cross-border logistics compliance

## KEYSTONE in a nutshell

KEYSTONE aims to develop & conceptualise a sustainable, efficient, and safe transport system for sharing data and allowing enforcement authorities to access them for compliance checks for goods and passengers.

### Duration

From 01 June 2023 to 31 May 2026.

### Get involved

Are you a logistics operator?  
Enforcement authorities personnel?

#### Contact Information

E-mail [keystone@smart-transportation.org](mailto:keystone@smart-transportation.org)  
Website [www.keystone-project.com](http://www.keystone-project.com)

## How to achieve this?

Tailor standardised digital solutions from existing use cases to the transport system.

Development of a web app solution implementing the Plug & Play Framework.

Reduction of operational costs and CO2 footprint.

Create a safer data transfer system & promote CCAM technologies further.
